NOTES

1. All interior dividers 12 mm thick (same as walls); sub-dividers inside a compartment may be 6 mm for lighter touch.
2. Front face fully open — the box tucks under the monitor shelf, so the only access is from the front.
3. Dashed internal lines show sub-bins within one compartment (shared walls, no structural separation).
4. Shallow (5") box means almost everything lays flat; only visiting cards (slot) and calculators (upright) use the full height.
5. Small-item grid A uses a 2×2 sub-grid for coins/keys/toothpicks/pushpins; add a thin removable tray to lift them to the lip for easier grab.
6. Width sums to 53" nominally; actual compartment widths shrink by the divider thickness between them.
7. All dimensions provisional — refresh when exact shelf clearance and desk width are measured.
