- LABELS
- STAPLER+GLUE
- PIN BOX / U-CLIPS

Lower tier — open tray
- LOOSE MIX (soft partitions)

coins, keys, bands, pushpins, toothpicks, U-clips, coasters — just drop them in

NOTES

1. LAYERED structure in the middle: a horizontal shelf splits the central section into upper and lower tiers. Full-height on both ends only.
2. UPPER TIER = removable pull-out trays. Each tray has a finger-hole on the front; grab it, slide the tray straight toward you to use, slide it back when done. Trays are open-top boxes with no lids.
3. LOWER TIER = one open tray running the full middle length. Only light partitions (half-height), no lids. For small loose items that don't earn a dedicated tray (coins, keys, bands, pushpins, toothpicks, U-clips, coasters). Rake things forward with your hand.
4. LEFT END = full-height upright slot for visiting cards. RIGHT END = full-height column for the 3 stacked calculators.
5. Pull-out trays slide on wooden rails inside the carcase. Each tray is 6 mm MDF (or 3 mm acrylic). Carcase and shelf are 12 mm MDF.
6. Widths are provisional. Build a cardboard mock-up and let the trays find their final widths through use.

PART NO.	ORG-D-004
MATERIAL	12 mm MDF carcase; 6 mm trays
UNITS	mm (inches in parentheses)
SCALE	not to scale · widths are provisional
