SHOP COUNTER ORGANIZER — v5 (varied shapes)

53" × 5" × 6" · shapes, not items · cross tray, recessed cards, drawers, floor zone · widths provisional

FRONT VIEW (open face, 8 zones with varied shapes)

MECHANISM KEY

Recessed card slot

Full-height column, 2 horizontal dividers = 3 stacks.
Front has a scalloped cut-out at each slot so you can grab the top card without digging in with fingers.

Cross-divided tray

One pull-out tray with a + divider inside = 4 sub-pockets.
You decide what goes in each pocket (pens, pencils, small tools); the shape just gives you four grouped bins in one tray.

Drawer over open bay (stapler)

Upper = small drawer with handle (sliding front panel) for stapler pins. Lower = open bay you can reach into for staplers.
Drawer hides mess; open bay = grab-and-go.

Open shelf over drawer (coins)

Reverse of above: upper = open shelf (pens or anything), lower = small drawer for coins. Keeps the loose heavy stuff tucked out of sight but easy to open.

Mixing tray

Lower = open area with soft partitions (half-height walls).
Upper = empty shelf, optional removable tray. Rake things forward.

Floor zone

Full-height open column. Thing sits on the floor of the box (no shelf above). Used for the finger damper or anything tall-ish that needs headroom.

Simple pull-out tray

Just the plain pull-out tray with finger-hole. Open bay below.
Catch-all shape when you don't need anything fancier.

Stacked column

Full-height open column with no shelves. Items stack naturally.
Used for the 3 calculators; same shape works for notebooks.

PART NO.	ORG-D-005
MATERIAL	12 mm MDF carcase; 6 mm trays/drawers
UNITS	mm (inches in parentheses)
SCALE	not to scale · shape over size
DRAWN BY	S. BANSAL
