NOTES

1. PENS are centred in the layout — the easiest reach from a standing position at the counter.
2. Front face is fully open; the box tucks under the counter shelf, front access only.
3. Dashed internal lines are sub-bins within one compartment (shared walls, not structural).
4. 3 CALCULATORS stack vertically in zone 1; same footprint as one.
5. FINGER DAMPER (currency wetting pad) gets its own small square slot — round base fits in a 3" square cell.
6. Widths are provisional — the arrangement and groupings are the design decision; shrink or stretch any zone once a trial is built.
7. Build a cardboard mock-up first before cutting MDF, to pressure-test which items keep moving to which zone.
